Air filter cleaner

Description Quick drying cleaning agent for all wet air filters of motorcycles. Removes effectively all oil residues and impurities, like dust and sand. This is the ideal cleaner to be used before lubricating the filter with Sunoco's Air Filter Oil.

Application Plunge the filter with in Air Filter Cleaner and clean it by squeezing the filter several times. It's important not to wring the filter out!!

After squeezing most of the cleaner out of the filter, rinse it thoroughly with water and again squeeze it until most of the water is out of the filter. Now let the filter dry.

Once dry it can be treated with Air Filter Oil.

Typical analysis:

- flash point : >61°C
- colour: red
